

I am writing you to ask that you not change anything with the XM satellite radio service. If regular radio wants to do the same service as XM then they need to take care of there business and start provideing great service. XM is a paid service. I choose to pay for it because I can't find the same service on regular radio. Again here is a big lobby tring to stop something that is working right because they can't get their own Regular AM and FM radio to work. Hey lets not fix something that is working right. Thank you.
